Assure CLOUD

Our "farm to fork" service
proposition enhances food safety
at every point of the value chain.

About Us

AssureCloud is the largest and most comprehensive food safety and veterinary laboratory group in southern Africa.

▶ Our Purpose

Our "farm to fork" service proposition enhances food safety at every point of the value chain. From where the product is grown and harvested, through manufacturing and retail outlets.

Some of South Africa's leading manufacturers and household food brands depend on us to support their food safety and compliance; and virtually every South African has benefited from the efforts of our expert team to ensure food safety in recent years.

Our services include sampling, testing and trouble-shooting, and we will support our customers in identifying sources of contamination and preventing future problems, so resolving barriers to market.

▶ Why Us

AssureCloud has national and international offices and our laboratories are ISO 17025 accredited. Our employees' locality, qualifications and expertise in food safety and occupational health and safety allows us to render an excellent service at a cost-effective pricing structure.

In addition to the above, AssureCloud is accredited by SAATCA and Food Bev SETA for various food safety related courses.

We are approved by the Consumer Goods Council of South Africa (CGCSA) to conduct supplier audits based on the Global Food Safety Initiative (GFSI) guidelines.

Agricultural Practices — Crops — Processing — Animal Feed — Livestock — Storage — Retail — Final Preparation at home and away — Pollution — Seafood — Distribution

▶ INTEGRATED FIVE STAR SYSTEM STANDARD

Assure Cloud's team of Food Safety specialists and registered auditors have the necessary expertise to assist industry in fulfilling its responsibility in terms of legal and industry standards i.e. the Health Act, 2003 (Act 61 of 2003), Foodstuffs, Cosmetics and Disinfectants Act (Act 54 of 1972) and numerous other Acts and Food Standards. With its network of offices throughout South Africa, Assure Cloud is ideally positioned to assist industry in addressing its obligations.

Assure Cloud's team of Food Safety specialists and registered auditors have the necessary expertise to assist industry in fulfilling its responsibility in terms of legal and industry standards.

Our Services

Our custom-built, state-of-the-art laboratories provide a broad range of testing and examination services. In addition, our dispersed geographic footprint allows us to carry out inspections, certification and training, along with full occupational hygiene audits anywhere in southern Africa.

Testing

AssureCloud has South Africa's largest and most comprehensive EHS, food safety and veterinary laboratory group. Our custom-built, state-of-the-art chemical and microbiological laboratories enable us to provide a broad range of chemistry, microbiological, immunology and molecular testing and examination services.

As an ISO 1702 accredited facility, we generate accurate, reliable and timeous results, performed in accordance with strict quality control standards and accredited methodologies.

Inspection

To ensure that a working environment is safe and risk-free, employers must assess the exposure of their employees to hazardous environmental conditions in the workplace. AssureCloud offers diagnostics testing, chemistry testing, and microbiology testing throughout the value chain.

This includes measuring and monitoring employees' exposure, comparing the results with prescribed standards, and implementing the steps needed to comply with the Occupational Health and Safety Act (Act No. 85 of 1993).

Occupational Hygiene

AssureCloud is a South African National Accreditation System (SANAS) accredited and AIA certified inspection body. Our team of fully qualified and registered occupational hygienists service customers across South Africa and into Africa, conducting risk assessments, reporting and recommendations in areas including chemical, biological and environmental risk.

We provide vital assistance to our customers by conducting full-risk assessments and evaluating the results to determine cost-effective measures to reduce any health hazard to an acceptable level, as per legislative requirements.

Certification

Certification of an organisation's management system confirms that it has documented and implemented a management system that complies to specific national and international systems specifications. AssureCloud Certification provides you with an independent assessment of the relevant system.

This verification, and resulting certification, serves as a testimony to the effectiveness and validity of the system, and to the company's commitment to professionalism, quality, safety and good governance.

Training

AssureCloud has a highly competent team of qualified specialists in the laboratory, food safety and occupational health & safety fields. With first-hand knowledge in their specialised disciplines, our experts offer unequalled training assistance, delivered either at a public training venue, or on-site at your premises.

Our training courses address a broad range of subjects, in the overarching fields of auditing, food safety, laboratory, occupational health & safety, and

www.assurecloud.co.za

We have the largest footprint of laboratories & inspections services in southern Africa.

With a footprint across South Africa and into Zambia, AssureCloud is the biggest laboratory group in the region. We have custom-built, state-of-the-art chemical and microbiological laboratories enabling us to provide a broad range of testing and examination services.

Our broad geographic footprint allows us to carry out testing close to source, with minimal transport and storage impacts on samples, and to deliver quick and accurate results.
